### **Types of Covid-19 Vaccine Adverse Reactions reported as of 3-5-22**

240 different types of Blood and lymphatic system disorders

284 different types of Cardiac disorders

430 different Congenital, familial and genetic disorders

79 different types of Ear and labyrinth disorders

100 different types of Endocrine disorders

439 different types of Eye disorders

628 different types of Gastrointestinal disorders

716 different types of General disorders and administration site conditions (Note: The list includes a death category with 16,704 deaths as of 3-5-22)

144 different types of Hepatobiliary disorders

111 different types of Immune system disorders

1090 different types of Infections and infestations including Covid-19 itself

193 different types of Metabolism and nutrition

371 different types of Musculoskeletal and connective tissue disorders

600 different types of Neoplasms benign, malignant and unspecified (incl cysts and polyps) disorders

846 different types of Nervous system disorders

173 Pregnancy, puerperium and perinatal conditions

434 different types of Psychiatric disorders

231 different types of Renal and urinary disorders

366 different types of Reproductive system and breast disorders

428 different types of Respiratory, thoracic and mediastinal disorders

422 different types of Skin and subcutaneous tissue disorders

284 different types of Vascular disorders

**= 8,609 Total types of disorders associated with the vaccines.**

(Note we did not include the following 5 categories which also randomly refer to various side effects 1)

Injury, poisoning and procedural complications. 2)

Investigations, 3) Product issues 4) Social

circumstances. 5) Surgical and medical procedures.

The in-depth data of disorders for the categories are listed below with the number of reported cases shown in parenthesis ( )
